SUBJECTS

	Page
Abrasion Question, The	345
Absorption by Rubber, Water	12, 24
Accelerators, Studies on Action of Organic, I, 273; II–III, 396; IV, 507; VI	510
Accelerators, Studies on Combined Action of	402
Acetylene Polymers and Their Derivatives. III. The Addition of Hydrogen Chloride to Vinylacetylene	121
Acetylene Polymers and Their Derivatives. V. The Polymerization of Bromoprene	317
Aluminum Chloride, Thermal Decomposition of Natural and Artificial Rubber in Presence of	64
A Method for Measuring Quantitatively the Swelling of Vulcanized Rubber in Organic Liquids by Means of a Voluminometer	406
Analysis of Organic Accelerators. IV	507
Analysis of Water-Soluble Ultra-Accelerators and a New Colorimetric Method	510
Anode Process for Rubber Articles and Coatings	537
Antioxygens, Rubber. III	391
Atmospheric Cracks on Unstretched Rubberized Materials. Their Origin and Prevention	33
Atmospheric Oxygen, The Problem of Changes in Rubber Brought About by	157, 566
Autoöxidation of Rubber Latex	378
Balata, Heat Treatment and Polymorphism of Gutta-percha and	76
Bromoprene, The Polymerization of	317
Chemical Resistance of Rubber as an Engineering Material	1
Chloroprene and Their Polymers, Homologues of	115
Chloroprene Plastic Polymers, Factors Affecting Rate of Vulcanization of	309
Coagulant, Sulfuric Acid as a Latex	415
Coatings, Anode Process for	537
Colorimetric Method for the Microanalysis of Copper and Manganese	510
Compression Stress-strain of Rubber	126
Copper and Manganese, New Colorimetric Method for Microanalysis of	510
Cracks on Unstretched Rubberized Materials, Atmospheric	33
Crystallization of Pure Ether-Soluble Rubber Hydrocarbons	351
Cure, T-50 Test of	525
Decomposition of Natural and Artificial Rubber in Presence of Aluminum Chloride	64
Degradation of Rubber Solutions, Influence of Oxygen on	111
Degradation of Rubber Solutions, The Limiting	376
Depolymerization and Oxidation, Influence of	92
Detection and Analysis of Organic Accelerators. IV	507, 510
Deterioration, Fundamentals in the Problem of Resistance to	193
Deterioration of Rubber when Exposed to Frictional Contacts	345
Determination of Free Sulfur	412
Determination of Size, Form and Solvation of Macromolecules	101
Diphase Rubber. The Diphase-forming tendency of Rubber as Shown by the Action of Pigments	442
Elastic Behavior of Vulcanized Rubber, The	217
Electrodeposition of Rubber from Revertex and Revultex	422
Elongation of Soft Rubber under Constant Load, Influence of Time on	520
Ether-soluble Rubber Hydrocarbon	351
Experiments on Oil-proof Rubber	278
Factors Affecting Rate of Vulcanization of Chloroprene Plastic Polymers	309
Filler, Surface Affinity of Rubber for a	263
Fillers, Interfacial Relationships between Rubber and. I	325, 465
Fillers, Titanium	106
Free Sulfur by a Volumetric Method, The Determination of	512
Free Sulfur in Rubber, The Volumetric Determination of	518
Free Sulfur, The Volumetric Determination of	412
Frictional Contacts, Some Factors in Deterioration of Rubber when Exposed to	345
Fundamentals in the Problem of Resistance to Deterioration	193
Gutta-percha and Balata, Heat Treatment and Polymorphism of	76
Gutta-percha Hydrocarbon, Modifications of the. II	86
Gutta-percha Hydrocarbons, Refractometry of Rubber and. I	92
Heat Treatment and Polymorphism of Gutta-percha and Balata	76
Heat Treatment of Vulcanized Rubber	225
Heating Curves for Vulcanization of System: Raw Rubber–Sulfur	56
Homologues of Chloroprene and Their Polymers	115
Hydrogen Chloride to Vinylacetylene, Addition of	121
Hydrogen Sulfide from Vulcanized Rubber, Influence of Temperature on Evolution of	46
Identification of Organic Accelerators	507
Influence of Oxygen on the Degradation of Rubber Solutions	111
Insulators, Rubber Vibration	299
Interfacial Relationships between Rubber and Fillers, I, 325, 465; II, 469; III, 473; IV	475
Isoprene from Rubber, Production of	232
Latex, Autoöxidation of	378
Latex Coagulant, Sulfuric Acid as a	415
Lyophilic Solutions	371
Macromolecules, Determination of Size, Shape and Solvation of	101
Manganese, New Colorimetric Method for Microanalysis of	510

	Page
Measurement of Water Absorption by Rubber	24
Measuring Microscope for Rubber Specimens	151
Microscope for Rubber Specimens, Measuring	151
Modifications of the Gutta-percha Hydrocarbon. II	86
Oil-proof Rubber, Experiments on	278
Oxidation, Influence of Depolymerization and	92
Oxygen, The Problem of Changes in Rubber Brought About by Atmospheric, 157; Correction	566
Oxygen on Degradation of Rubber Solutions, Influence of	111
Particle Size of Zinc Oxide, Effect of	288
Physical Properties of Rubber, Effect of Particle Size of Zinc Oxide on	288
Pigments, Diphase-forming Tendency of Rubber as Shown by the Action of	442
Plasticity and Its Determination, Some Aspects of	236
Plasticity Measurements in the Rubber Industry. I and II	244
Plastic Polymers, Rate of Vulcanization of	309
μ-Polychloroprene, Roentgenographic Investigation of	113
Polymers, Acetylene	121
Polymers, Rate of Vulcanization of Plastic	309
Polymorphism of Gutta-percha and Balata, Heat Treatment and	76
Protective Agents, Behavior of	391
Quantitative Method for the Determination of the Swelling of Vulcanized Rubber in Organic Liquids by the Aid of a Voluminometer	406
Refractometry of Rubber and Gutta-percha Hydrocarbons. I	92
Reinforcing Action and Other Properties of Titanium Fillers in Rubber Stocks	106
Resistance of Rubber as an Engineering Material	1
Resistance of Vulcanized Rubber, Tear	325, 465
Resistance to Deterioration	193
Revertex, Electrodeposition of Rubber from	422
Revultex, Electrodeposition of Rubber from	422
Roentgenographic Investigation of μ–Polychloroprene	113
Rubber and Thioglycolic Acid	71
Rubber Antioxygens. III. Behavior of Natural and Artificial Protective Agents toward Sunlight and Ultra-violet Light	391
Rubber Vibration Insulators. Some Characteristic Properties and Tests	299
Sol-rubber Hydrocarbons, Separation and Identification of	367
Sols, Action of Organic Accelerators on Rubber	273
Sols, Action of Ostromislenski's Vulcanizing Agents on Rubber	400
Sols, Lyophilic. II. Rubber	371
Sols, Solvation of Rubber	265
Solutions, Influence of Oxygen on Degradation of Rubber	111
Solutions, State of Rubber In. II	436
Solvation of Macromolecules	101
Solvation of Rubber Sols	265
Some Aspects of Plasticity and Its Determination	236
Specific Gravity of Rubber before and after Its Vulcanization, Verification of	103
State of Cure, The T-50 Test for	525
Stress-Strain of Rubber, Compression	126
Stress-Strain Relationships of Vulcanized India-Rubber, I, 486; II, 495; Correction	504
Structural Viscosity in Lyophilic Sols. II. Rubber Sols	371
Studies in the Interfacial Relationships between Rubber and Fillers. I. The Tear Resistance of Vulcanized Rubber	325, 465
Studies in the Interfacial Relationships between Rubber and Fillers. II. The Effect of Surface Treatments on Clay as a Rubber Filler	469
Studies in the Interfacial Relationships between Rubber and Fillers. III. Properties of Vulcanized Rubber Prepared from Compounded Latex	473
Studies in the Interfacial Relationships between Rubber and Fillers. IV. The Effect of Mastication on the Properties of Vulcanized Rubber	475
Studies on the Combined Action of Organic Accelerators for Rubber Vulcanization	402
Studies on the Nature of the Action of Organic Accelerators for Vulcanization. I. Action of Organic Accelerators on Rubber Sols	273
Studies on the Nature of the Action of Organic Accelerators for Vulcanization. II. Special Properties of Accelerators	396
Studies on the Nature of the Action of Organic Accelerators for Vulcanization. III. The Action of Ostromislenski's Vulcanizing Agents on Rubber Sols	400
Studies on the Nature of the Action of Organic Accelerators for Vulcanization. IV. Detection and Analysis of Organic Accelerators. 1. Systematic Identification	507
Studies on the Nature of the Action of Organic Accelerators for Vulcanization. VI. Detection and Analysis. 3. Analysis of Water-Soluble Ultra-accelerators and a New Colorimetric Method for the Microanalysis of Copper and Manganese	510
Studies on the Thermochemistry of Rubber. VII. Heating Curves for the Vulcanization of the System: Raw Rubber–Sulfur (2)	56
Sulfur by a Volumetric Method, Determination of Free. II	412
Sulfur in Rubber, The Volumetric Determination of Free	518
Sulfur, System: Raw-rubber	56
Sulfur, Volumetric Determination of Free	412
Sulfuric Acid as a Latex Coagulant	415
Sunlight and Ultra-violet Light. Behavior of Natural and Artificial Protective Agents toward	391
